Da Nang, VietNam

OBJECTIVE

I am a fourth-year Software Engineering student at FPT University with a strong interest in building a professional career in the technology field. In the short term, I want to learn and gain practical experience, and further develop my technical and problem-solving skills in a dynamic working environment. In the long term, my goal is to become a Full-Stack Developer capable of contributing to impactful projects and delivering effective technological solutions.

WORK EXPERIENCE

FPT SOFTWARE

Sep 2024 - Dec 2024

Intern Web Developer

Full-stack pizza ordering e-commerce platform using ASP.NET Core, focusing on security, performance, and user experience.

Key Features:

- Developed a **pizza ordering e-commerce platform** with a focus on frontend performance and user experience.
- Built responsive UIs with **ReactJS + Bootstrap**, ensuring cross-device compatibility.
- Integrated RESTful APIs for order processing, inventory management, and real-time order tracking.
- Implemented secure **JWT authentication with role-based access control**.
- Collaborated with backend engineers to optimize database queries and ensure smooth data flow.

PROJECTS

Clinic Management

System

6/2025 - 8/2025

Front-end Developer

Description: A web-based clinic management system designed to streamline operations such as patient management, appointment scheduling, and staff coordination. The platform supports secure authentication and role-based access for administrators, doctors, and staff.

Team size: 4

Tech Stack: ReactJS, TailwindCSS, React Query, Node.js, MongoDB

Responsibilities:

- Developed a **full-stack web application** with ReactJS (frontend) and Node.js/Express (backend).
- Implemented **patient management, appointment scheduling, and doctor/staff management** features.
- Built a **role-based authentication system** using JWT for secure access control.
- Designed and deployed **RESTful APIs** for managing patients, appointments, and medical records.
- Collaborated with team to create a modern **dashboard UI** for doctors and staff.
- Managed **database modeling and integration** using MongoDB and Mongoose. Can be extended to Spring Boot + SQL stack as required.
- Utilized Git and Postman for version control and API testing.

Handmade E-commerce Platform

5/2024 - 7/2024

Full-Stack Developer

Description: Comprehensive e-commerce platform specializing in Vietnamese handmade crafts and traditional products with integrated vendor management system.

Team size: 2

Tech Stack: ASP.NET Core 6.0, Entity Framework Core, SQL Server, Bootstrap.

Responsibilities:

- Designed a **multi-vendor marketplace** for Vietnamese handmade products.
- Secure authentication system with role-based access control for customers, vendors, admins, and staff.
- Comprehensive vendor management system for product uploads, order tracking, and sales analytics.
- VNPay payment gateway integration for secure Vietnamese online transactions
- Product catalog management with search, filtering, and category organization.
- Order management system with real-time status tracking and notification.
- Experience with SQL Server, database design, and secure payment gateway integration.

AI Travel Planner

9/2024 - 12/2024

Mobile Developer

Description: Cross-platform mobile application that leverages AI to generate personalized travel itineraries based on user preferences (destination, budget, duration, and activities). Provides real-time suggestions, maps integration, and itinerary management.

Team size: 1

Tech Stack: React Native, JavaScript/TypeScript, Context API, Goong API, RESTful API, Git.

Responsibilities:

- Developed a **cross-platform mobile app** with React Native for both Android and iOS.
- Implemented **AI-driven itinerary planner** that generates travel schedules dynamically based on user input.
- Built modular UI components for activity cards, trip overview, and interactive maps.
- Managed application state using **Context API**, ensuring smooth data flow and user interactions.
- Integrated Google Maps API for location display and navigation support.
- Designed project structure with reusable components, utilities, and configuration files for maintainability.
- Applied Git for version control and collaborative workflow.

EDUCATION

2021 - 2025

FPT University

Software Engineering

Academic achievement:

GPA: 7.5/10

TOEIC: 650

SKILLS

Framework

Frontend: **HTML, CSS, JavaScript, ReactJS, Vue.js, Next.js**

Backend: **Java Spring Boot, Node.js/Express, ASP.NET Core**

Database

MySQL, SQL Server, MongoDB

DevOps and Tools

Version control: Git, Postman

Others: RESTful APIs, JWT Authentication
